DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to polynucleotides encoding the protein set forth in SEQ ID NO: 2, classified in class 536, subclass 23.5.
- II. Claims 4 and 5, drawn to polynucleotides encoding the protein set forth in SEQ ID NO: 16, classified in class 536, subclass 23.5.

These Inventions are different, each from the other, because of the following reasons.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, products of Inventions I and II are different inventions because they are physically and functionally distinct chemical entities

Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
